OPR: 913AW/SE (Lt Col Kevin Shinsky)
Supersedes 913 AWI 91-201, 5 December 1995

Certified by: 913AW/CC (Col Charles Ethredge)
Pages: 2
Distribution: F

This instruction implements Air Force Policy Directive 91-2. It establishes the Commander's Safety Program. It applies to all members stationed to the Willow Grove Air Reserve Station.

SUMMARY OF REVISIONS

This instruction has been globally revised to reflect current guidance. A (I) indicates a revision from previous edition.

1. The Commander's Safety Program:

1.1. Safe mission accomplishment is a command directive. Unit Commanders, functional managers and supervisors are responsible for providing a safe and healthful work environment. They must ensure compliance with occupational safety, fire protection, and health program requirements. Operators are responsible for the safe operation of equipment and the use of provided personal protective clothing and equipment. Safety is synonymous with efficiency and consequently ensures mission accomplishment. I expect every member of the 913th Airlift Wing to accept mishap prevention as a personal responsibility.

1.2. Unit commanders and functional managers are directed to implement effective safety programs within their unit and demand compliance with these programs. It is the first line supervisors in the operating areas that carry the major responsibility for safety enforcement. Supervisors must provide safety training to all individuals and see that all hazards are eliminated or controlled. Superior supervisors detect potential hazards and eliminate them on the spot.

1.3. The "U.S. Air Force Mishap Prevention Program" (AFI 91-202) and the "Air Force Occupational Safety, Fire Prevention and Health Program" (AFI 91-301) provide the necessary guidance to ensure the personnel of the 913 AW carry out their safety responsibilities.

1.4. WORK SAFE, FLY SAFE, PLAY SAFE, AND BE SAFE TO ENJOY ANOTHER DAY.

CHARLES D. ETHREDGE, Colonel, USAFR
Commander
